

# Brunner Group in Rheinau

Pioneering new build with optimised space usage

# Innovation Factory places its trust in primion

## **Brunner Group in Rheinau expands its premises**

The Brunner Group, located in Rheinau, Germany, is one of the leading international providers of designer contract furniture. The family-run business has a workforce of over 500 and manufactures exclusively at its headquarters in Rheinau and markets its products all over the world. It delivers over 500,000 chairs and 100,000 tables annually from its factory.

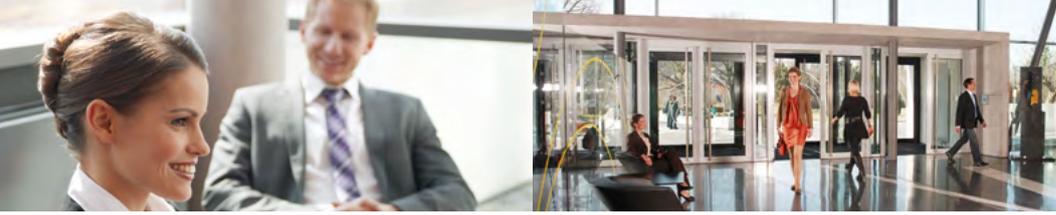

## **A coherent holistic concept for the Innovation Factory**

A pioneering new build is being created at the heart of the Brunner Group's factory site. The "Innovation Factory" is a multifunctional, standalone building that has been planned by the well-known Henn architectural practice. The goal of the expansion is to respond to the continuous growth path that the company is on, with optimised processes and with more space for development and production. The 6,525m<sup>2</sup> new build is scheduled to be completed by the end of this year.

During the building and restructuring phases, the topics of workflow management and access control were brought into focus, and following a long tendering process, primion came out on top with its holistic concept.

Benjamin Himmelsbach from the primion's regional office in Karlsruhe: "This was an exciting project with a company that is very successful thanks to its sustainable programme of growth and its innovative solutions. Our goal is to secure Brunner's premises with primion access control, to protect its equipment and know-how as well as to design its time recording processes in a more efficient and more transparent way. We are very much looking forward to our future collaboration."
